

# Community Wellbeing: Social Determinants of Health Dashboard

## What are Social Determinants of Health

Social Determinants of Health are the conditions in the environments where people are born, live, learn, work, play, worship, and age that affect a wide range of health, functioning, and quality-of-life outcomes and risks.

## Who is the Dashboard Intended for?

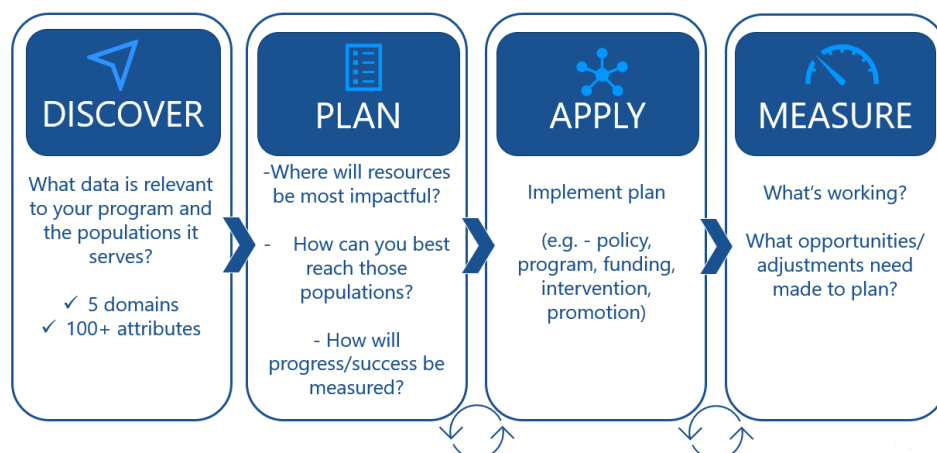

The Community Wellbeing: Social Determinants of Health dashboard is relevant to anyone serving Ohioans that would benefit from greater insight into community conditions for funding, program, and policy considerations to make the greatest impact. Users who benefit include (but certainly are not limited to) state and local governments, health and educational organizations, and non-profit organizations.

## What Data is Included in Dashboard?

There are five (5) domains including economic vitality, neighborhood and physical environment, healthcare access and quality, education access and quality, and social and community environment and over 100 key community attributes, including single parents, chronic diseases and, children living in poverty. Data is utilized from the Census Bureau, Centers for Disease Control and Prevention, and American Community Survey at the census tract level and is displayed in easily consumable formats including maps, bar charts, and CSV download.

## Applying the Dashboard to Maximize Impact

This dashboard can proactively identify where funding, programs, and policies can make the greatest impact and begin to narrow health, educational, economical, and community disparity outcomes for Ohioans.

View the [Community Wellbeing: Social Determinants of Health](https://data.ohio.gov) dashboard on the DataOhio Portal (data.ohio.gov) or visit the Ohio Department of Health, [Health Opportunity](https://health.ohio.gov) webpage for more details.
